

CANNED FOODS

We are able to carefully select the right suppliers of primary ingredients for our products because we have branch offices all over the world, and we then monitor them from seed to harvest.

The subsequent processing in our own facilities not only ensures the high quality and safety of our products, but also allows us to respond to your special requests at any time, whether for a new recipe or proprietary packaging.

We can guarantee consistent availability of the more than 400 fruit, vegetable, fish, and meat products we stock because we have our own warehouses.

Many of our products are Fairtrade-certified, including fish and seafood from sustainable fishing and breeding grounds, as well as fruit and vegetable products grown in environmentally friendly conditions to organic standards.

We are happy to provide you with goods that bear one of our trademarks or your own brand- the choice is yours.

Seafood and fish

Transparent and traceable to origin: We only work with certified suppliers who recognise and live up to their social responsibilities.

We take sea protection seriously and therefore source fish from sustainable fishing grounds. We also insist that it was caught using species-appropriate and dolphin-safe methods.

Because we have our own warehouses, we keep more than 50 different items on hand at all times, such as tuna in oil, water, or dressing, sardines, mackerel, mussels, and prawns.

From the 80g can to the 7kg polybag for bulk consumers, we have it all.

FRUITS

We have fruit available all year. From golden yellow pineapple to mandarin oranges, mangos, peaches, and apricots, to cherries, strawberries, and exotic fruits.

We bottle and can over 150 freshly harvested fruit products, giving you a vitamin store all year. Organically grown products are also available.

We have exactly what you need, whether it's a 370ml jar or a 5kg can, and whether you're a retailer or a bulk consumer.
